

Didn't We Just Vote?

I have seen the letters to the editor, listened to citizens debate, read the articles with facts presented and still cannot for the life of me understand the point of this whole recall effort. The voters of Summit County re-elected Mayor Plusquellic less than two years ago. The point is that our city is in much better shape than other surrounding cities, the Mayor has secured Goodyear and Bridgestone remaining in the area, has created positive alliances with the University of Akron and our medical community, has the Knight Center for Excellence working to provide a digital corridor to help education, business and industry among many other progressive achievements. Like him or not, he has not changed from the man who we just re-elected.

Now here's the problem. If you agree with what I have said then you have to get up on Tuesday, June 23 and go and vote against the recall. We know that the people who are spearheading this costly and frivolous recall will be mobilizing their troops. Sitting at home, shaking our heads and wondering what all the fuss is about will not defeat this effort. We have to live our values by going to the polls and voting no!
