

Worried about Kasich

I have great concerns about Gov.-elect John Kasich and what his plans are for Ohio. So far he has cost us federal funds for high-speed, passenger rail even before he has taken the oath of office. Once California and Florida have high-speed rail up and running, we will see how that investment would have helped Ohio. Kasich needs to remember he serves all Ohioans, not just his big-business buddies and people who voted for him.

He also needs to remember that Ohioans need jobs that pay more than \$8 an hour or \$9 an hour. Some are saying Kasich is a one-term governor. It's what he might do during the next four years that would put Ohio back to 1912, instead of advancing us into the future, that concerns me most.
